REJECTIONS OF CLAIMS BASED FORMAL MATTERS

Claims 36,45,53 and 60 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added material that is not supported by the specification is as follows:

a) Claims 36 and 53 – Applicant's disclosure does not provide support for the positioning of the zipper and the adhering of the first profile of the zipper to the film web before providing the wall panels, i.e. the forming of the web into a form that has the two wall panels.

b) Claim 45 – Applicant's disclosure does not provide support for the cutting of the side seals after the filling operations. The cutting is performed before the filling operation in all of Applicant's non-thermoform embodiments shown in Figures 12-19.

c) Claim 60 - Applicant's disclosure does not provide support for the use of tamper evident seal for the Figure 14 embodiment which is the one set forth in the independent claim 50. The tamper evident seals set forth in Applicant's disclosure are directed to different embodiments.

ALLOWABLE SUBJECT MATTER

Claims 34,35,37-44,46-52 and 54-59 are allowed.

INTERFERENCE

Claims 34-60 of this application have been copied by the applicant from U. S. Patent No. 6,347,437 and 6,427,421. These claims are not patentable to the applicant because some of the claims are rejected on the bases stated above.

An interference cannot be initiated since a prerequisite for interference under 37 CFR 1.606 is that the claims be patentable to the applicant subject to a judgment in the interference.
